

## **Asbestos Policy**

Menfor understands the risks to health arising from exposure to asbestos and are committed to protecting all staff, contractors and other third parties from these risks. No employee, contractor or third party shall carry out any direct work on ACM's (Asbestos Containing Materials).

If any employee, contractor or third party suspect that the materials they are working with contain asbestos, they must stop work immediately, report it to their Supervisor and/or site Health and Safety Officer.

Menfor will only recommend that any sampling of this material will only be undertaken by an approved and licenced contractor. Only approved waste carriers and licenced contractors shall be appointed where ACM disposal is required.
